

## Asian Journal of Law and Society planned for 2014 launch in China

Cambridge University Press and KoGuan Law School at Shanghai Jiao Tong University will publish an independent, peer-reviewed publication, the *Asian Journal of Law and Society* (AsianJLS).

AsianJLS promises to encourage empirical and multi-disciplinary research in law and its relationship with society in Asia. It will present

research that brings an Asian perspective to socio-legal issues of global concern, or that which uses Asia as a starting point for a comparative exploration of topics in law and society. AsianJLS plans to initially publish two issues a year with the first issue in spring 2014.

## OUP to publish *Publications of the Astronomical Society of Japan*

Oxford University Press (OUP) and the Astronomical Society of Japan are partnering on *Publications of the Astronomical Society of Japan* (PASJ). OUP will assume publication of PASJ from January 2014. The journal has, up to now, been self-published by the Astronomical Society of Japan.

PASJ was founded in 1949 and

publishes papers on all aspects of astronomy, astrophysics, and the fields closely related to them. In addition to research papers, the journal accepts 'letters to the editor', which provide quick communication of observational, as well as theoretical, results that impact astronomy.

## Frontiers launches OA energy journal

Frontiers has launched its *Frontiers in Energy Research* journal.

Through the journal the publisher hopes scientists will join together to examine how new energy systems can be integrated in the economic and social fabric of our world. The journal aims to serve as

a free-to-access point of reference on energy issues. Topics will range from energy nanotechnology solutions to energy policies, including energy-efficient building and the energy-water nexus.

## EBSCO adds content from Torrossa Collections to EBSCO Discovery Service

EBSCO Information Services and Casalini Libri have partnered to enable content from Casalini Libri's extensive Torrossa.it platform to be searched within EBSCO Discovery Service (EDS). Casalini Libri is a leading supplier of European books, journals, digital content and bibliographical data to libraries and agencies throughout the world.

The agreement between

EBSCO and Casalini Libri will add metadata from the following Torrossa.it collections into EDS: *Editoria Italiana Online*; *Edición Española Online*; Fabrizio Serra Editore e-journal collections; Franco Angeli e-journal collections; Olschki e-book and e-journal collections; Ecole Française de Rome; and BIZ – Biblioteca Italiana Zanichelli.
