

# integrated e-book acquisitions

**build your  
digital  
library**

Casalini Libri simplifies digital acquisitions, licensing and integration with library catalogues through the inclusion of electronic titles in our online databases and ordering workflows.

## Over 35,000

Spanish and Italian e-books are currently available in our digital library; new titles and new collaborating publishers are added continuously. The focus of our electronic collections is Humanities and the Social Sciences.

## Our new title alerts

include information on newly available e-books. You can receive regular personalised new title alerts for the subjects that interest you most.

## You can select e-books

directly through our website at <https://libraries.casalini.it>: use the *ilibri* database to search. Selection and ordering for e-books is completely integrated with the workflows in place for print titles.

## Access your content

with automatic IP address recognition at [access.torrossa.com](http://access.torrossa.com).

## View and use your content

- in permanent access
- as PDF files
- with options for downloading, printing and copy and paste.

## Torrossa digital collections

have been selected by our Approval specialists to offer a range of subject-based, publisher-based and interdisciplinary packages of high-quality content. View the catalogues at [www.casalini.it/torrossa](http://www.casalini.it/torrossa).

## Create your own

collections, by providing a bibliographic profile and letting our expert selectors do the work, or through a PDA (Patron driven Acquisition) plan, which can be filtered or not as you prefer.
