Since 1991, BiGLI has gathered bibliographical records of publications appearing throughout the world in the fields of Italian Language and Literature and has become a knowledgeable reflection of the diffusion of Italian culture in the world. BiGLI is therefore a unique tool for professionals in the field of Italian Studies research.

The digitisation of this enormous bibliographical archive permits consultation through a sophisticated search engine operating on metadata and subjects; the results of each research can be filtered further, in order to offer extremely refined final information.

The entire archive, increased and updated regularly, will be available shortly through Casalini Libri only.

A special discount will be granted to institutions already subscribing to the print edition.

CONTACTS
