- David Livingstone
- 20th Century > John Logie Baird > television > Baywatch and Big Brother
University of Strathclyde

- James Watt
- David Livingstone
- John Logie Baird
- 21st Century > Arthur Van Hoff > Javascript > Pop up windows
Why bother getting involved?

- Leave it to technology
  - But libraries are user focussed

- Leave it to the market?
  - But we want to change society, which is not a commercial proposition

- Leave it to big countries?
  - But one size doesn’t fit all
    - Small is beautiful from Finland to Singapore
  - Not everyone wants to share

- Leave it to publishers?
  - But they have no grandmothers
Underpinning philosophy

- The Vesalius Conundrum
- This is rocket science not a plug in the wall
- Ease of use = “the satisfied inept”
- IT Skills Gap is growing (Production<demand)
- Public sector bodies are producers not just consumers of information
- The Internet is AT PRESENT very flawed as a teaching and learning tool
- Librarians are information professionals
Why you should fall to your Knees and worship a Librarian
"People become librarians because they know too much. Their knowledge extends beyond mere categories. They cannot be confined to disciplines. Librarians are all-knowing and all-seeing. They bring order to chaos. They bring wisdom and culture to the masses. They preserve every aspect of human knowledge. Librarians rule. And they will kick the crap out of anyone who says otherwise."

(Olson, 2000)
User not technology driven

- The Library as place
  - Second most used public service
  - University space has not grown
- Communities share a history
- Librarians can collect and interpret that
- Returning their history to communities
- Collection focussed
Glasgow Digital Library

Organised digital collections to support teaching, learning and research

- **Aspect**
  Access to Scottish Parliamentary Election Candidate Materials 1859

- **Victorian Times**
  Social, political, and economic conditions 1837-1901

- **Virtual Mitchell**
  Images of Glasgow by area, theme or subject 1860-1980

- **Springburn Virtual Museum**
  Photographic from Springburn Community Museum 1860-1980

- **Red Clydeside**
  Political History of the Scottish Left 1890-1922

- **100 Glasgow Men**
  Memoirs and portraits of 100 Glasgow Men 1855-1885

- **GlasgowInfo**
  Directory information for and about Glasgow 2002

- **Voyage of the Scotia**
  Scottish National Antarctic Expedition 1902-04

- **Springburn Virtual Museum**
  Photographic from Springburn Community Museum 1860-1980

- **Red Clydeside**
  Political History of the Scottish Left 1890-1922

- **100 Glasgow Men**
  Memoirs and portraits of 100 Glasgow Men 1855-1885

- **GlasgowInfo**
  Directory information for and about Glasgow 2002

- **Voyage of the Scotia**
  Scottish National Antarctic Expedition 1902-04

The Glasgow Digital Library is based at the Centre for Digital Library Research in the University of Strathclyde. It was set up as part of the Research Support Libraries Programme, supplemented by funding from SCRAN for specific digitisation projects.
Glasgow Digital Library

- Identifying Resources for Digitisation
- Encouraging Electronic Content Creation
- Cost-cutting by City-wide Licences
- Mirroring heavily used content
  - The Virtual Human
- Setting and Implementing Standards
- A distributed regional resource - ScoDiDiLi
Springburn Virtual Museum

An online exhibition of photographs and related materials from Springburn Community Museum

Law’s Laws

1. Good Information systems will drive out bad
Law’s Laws

1. Good Information systems will drive out bad
2. User Friendly systems aren’t
Training

- The satisfied inept – staff as well as students
- 13% get information from the Library
- But it’s also a:
  - cybersandpit
  - dating agency
  - learning space
  - 7x24 chatroom
  - Training ground
Data preservation and trusted repositories

- Clearing the study
- Building research collections for the future
- Digital Asset Management and Curation
- Repository standards
Trusted Repositories: the five Maori tests

- Receive the information with accuracy
- Store the information with integrity beyond doubt
- Retrieve the information without amendment
- Apply appropriate judgement in the use of the information
- Pass the information on appropriately
Digital libraries are a social phenomenon as much as a technical one.

Communities cut across geography as well as class and function.

There is a lot of money available for creating collections.

Commercial is not necessarily best.

- He who pays the piper may call the tune – but may not get an audience.
The Scottish National Antarctic Expedition, 1902
