Knowledge Singularity

“What distinguishes knowledge from information is the way in which knowledge empowers actors with the capacity for intellectual or physical activity. Knowledge is a matter of cognitive capability and enables actors to do and reflect. Information, by contrast, is passive and meaningless to those without suitable knowledge. Knowledge provides the means by which information is interpreted and brought to life”.

*The Work Foundation’s Knowledge Economy Programme interim report (Brinkley 2008)*

Yewno enables Knowledge Singularity — a day when all the world’s knowledge is easily accessible and at everyone’s fingertips!
Why Yewno Discover?

 WHEN YOU KNOW WHAT YOU’RE LOOKING FOR

- Simple questions
- Straight answers

 WHEN YOU DON’T KNOW WHAT YOU’RE LOOKING FOR

- Open-ended questions
- Complex answers
Y-Core Technology

From data to knowledge via machine learning, computational semantics and graph theory

Computational Linguistics analysis is undertaken on raw data to create a vast, multi-layered, multi-dimensional set of concepts.

Data ingestion

(Deep) Neural Nets

(Dynamic) topic models

Stochastic learning

Concepts are projected onto a hierarchical **Knowledge Network** that represents their relations.

Knowledge extraction

Data-driven analysis is performed against the knowledge network to detect emerging phenomena.

Generational differences in work commitment of software professionals: myth or reality? (Report)

Foundation for Organisational Research amp. Education 2011

... Generation Y workers experience a higher degree
Smith and Denton identified that central to modern America youth participation in religion is feeling good, happy, secure, and at peace. Similarly, the Gen Y participants in this study reported feeling peace and life satisfaction as major affective benefits. Smith and Denton however, considered that such an emphasis in youth spirituality reflects a cultural norm individualism and self-glorification. In contrast, the dominant concern of participants in this study was a desire to develop their relationship with God. For all of these Gen Y participants, spiritual matters were important and acted as a regulator of behavior in their lives. The awareness of spiritual matters allowed these young people to understand their lives in terms of how their choices affected the spiritual well-being. These young people believed that modification of personal behavior contributed toward enhancing their spiritual well-being.
