

BIBFRAME in / for Hungary

Conclusions of a PhD Thesis

Miklos Hubay
Library IT Group Leader
Petőfi Literary Museum

A Little History

First informations (November, 2014)

Master's Thesis (June, 2016)

Doctoral School (2016-2020)

National Scientific Students' Associations Conference (April, 2017 - Special Award)

Presentation with **Ádám Horváth** (April, 2017 - Networkshop Conference)

National Széchényi Library's BIBFRAME Test Conversion Project (2018-2019)

University Courses (2019-)

PhD Thesis and **Petőfi Literary Museum's** Test Conversion Project (2021-2022)

Thesis Defence (late 2022?)

Table of Contents

- Introduction
- Age of Markup Languages From SGML to XML
- Entities in LIS
 - *Historical Approach and FRBRization Techniques*
- Appearance of RDA
- Basics of Linked Data
 - *RDF and RDFS, OWL, Vocabularies, VESs, Data Reconciliation, FRESNEL, SHACL, ShEx, etc.*
- Linked Data in Libraries
 - *BIBFLOW, Share-VDE, BLUECloud, Library.Link, ALIADA, Innovative Inspire, Stanford Blacklight*
- SEO with Linked Data
- *BIBFRAME*

Table of Contents - BIBFRAME

- Model 1.0 and Model 2.0
- Extensions (**bibfra.me, ARM, bibliotek-o, PMO, bflc**)
- Interoperability (**RDA Element Sets, Europeana, schema.org**)
- Conversion Tools
- Cataloging Platforms
 - **BFE+BFPE (now MARVA), Sinopia, LIBRIS XL, RERO, etc.**
- **NSZL Project Results and Consequences**
- **PLM Data Conversion Project**
 - **Analysis, Critical Approach and Consequences**
- Summary and Evaluation

*there are much more:
Scribe, CEDAR, Metadata
Maker, etc.*

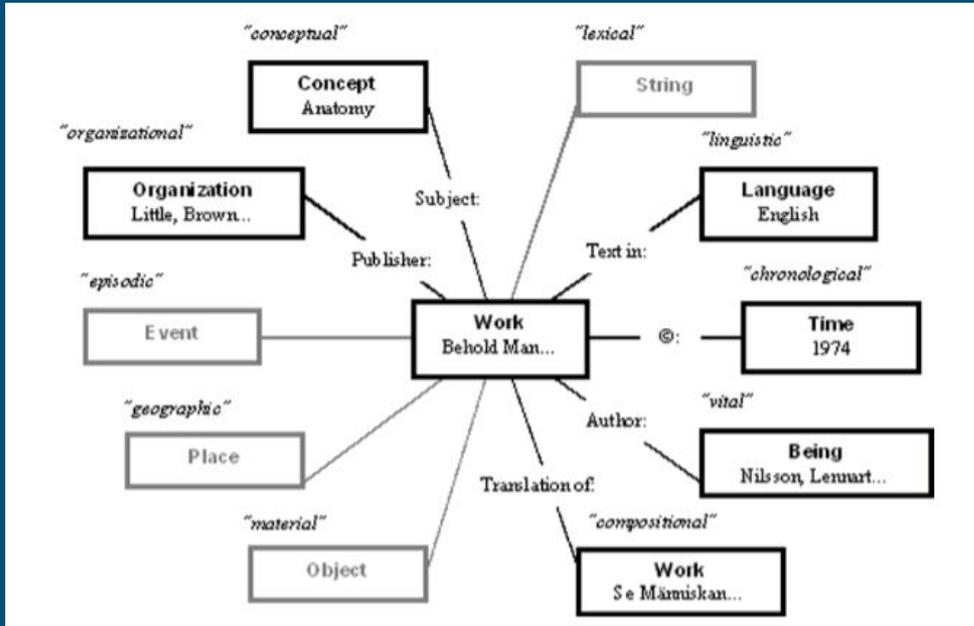

A Snippet From the Past: XOBIS

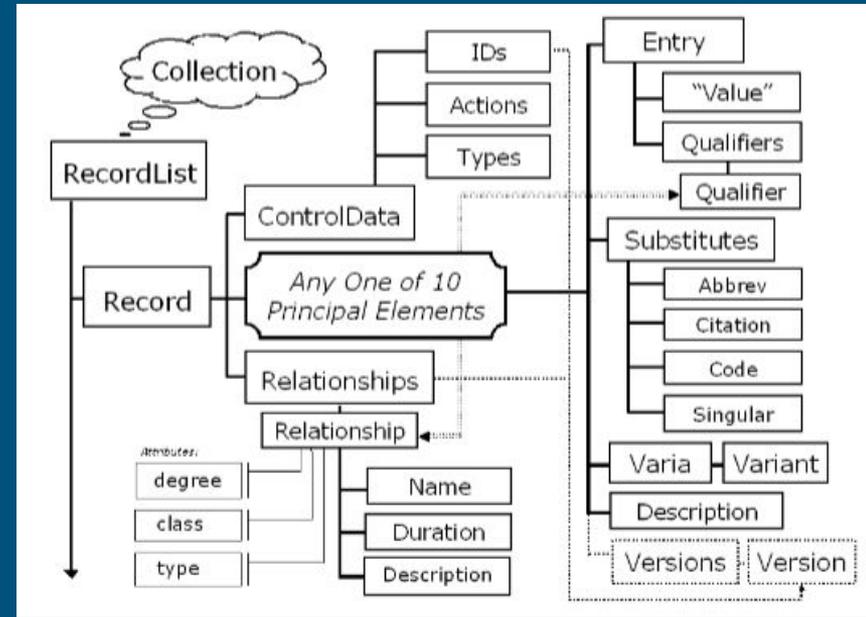

A Forgotten Model

- one of the most interesting and most forward-looking implementations of XML in LIS
- created in 2002(!) - emphasizes **connections** four years before Linked Data
- *“XOBIS is an XML schema which reorganizes bibliographic and authority data elements into a single, integrated structure. It explores balancing valuable traditions with new technologies to create a potential foundation for future access to information in a distributed digital environment.”*
- *„a middle path between the complexity of MARC and the oversimplification of the Dublin Core.”*

Principal Elements and Connections

10 Principal Element
100 Connection Type

HUNMARC and BIBFRAME

Some Previous Hungarian LD-projects

National Széchényi Library - LD publication project (2010)

http://nektar.oszk.hu/wiki/Semantic_web

- RDFDC for bibliographic data
- FOAF for name authority entries
- SKOS for subject terms and geographical names

NSZL-Hungarian Electronic Library

NSZL-Digital Archive of Pictures

<https://mek.oszk.hu/html/lod.html>

<https://dka.oszk.hu/html/export.html>

- DCTerms, BIBO, FOAF, ORE

MOKKA-UP

- experimental BIBFRAME data set from the Hungarian Common Catalogue with Share-VDE front-end

- <http://www.w3.org/2000/01/rdf-schema>
- <http://www.w3.org/1999/02/22-rdf-syntax-ns>
- <http://purl.org/dc/terms/>

- <http://viaf.org/viaf/>
- <https://creativecommons.org/licenses/>
- <http://id.loc.gov/authorities/subjects/>
- <http://id.loc.gov/vocabulary/iso639-2/>
- <http://nektar.oszk.hu/data/auth/>

Some Previous Hungarian LD-projects

Hungarian Museum of Fine Arts (2015) - with ALIADA

http://archiv.magyarmuzeumok.hu/muhely/2337_potty_lesz_a_szepmuveszetibol (only in Hungarian!)

- FRBRoo, WGS84, SKOS
- MARC, DC and LIDO as input

Hungarian National Museum (2017-2018)

<https://mnm.hu/hu/cikk/potty-lett-magyar-nemzeti-muzeum> (only in Hungarian!)

- BIBFRAME → enrichment with BNF, ISNI, LCNAF, VIAF, Wikidata
- Virtuoso and Monguz OPAC3 integration

Problem

*There were no publications (and still there aren't)...
for librarianship...
with critical approach...
about the details of metadata or conversion processes...
and data quality!*

Conversion Project in Petőfi Literary Museum

- **CHO data in HUNMARC(-based) format** with relevant data fields and subfields
 - can also be expressed as LIDO
 - unique content in standardized fields
 - new data fields for museums, not just in 9XX

*~ 22.000 bibliographic records from the library of the museum →
Relevant consequences for the whole Hungarian library landscape*

God Bless the MARCEdit!

bf: BibFrame TestBed

The BibFrame2 Testbed is a simple to use utility designed to allow metadata specialists the ability to model their data using BibFrame Concepts.

Four years later...

Is the librarianship strong enough to make
BIBFRAME
well-known?

Do we have to use parallel conversion
methods?

Will history repeat itself?

Are these data really **LOUD**?

© Rob Sanderson, 2018

What is the critical data
quantity in BIBFRAME?

Thank You!

Miklos **HUBAY**

Metadata Librarian, Library IT Group Leader

Petőfi Literary Museum
