URL <https://docs.crypto-service.com>
Domain [crypto-service.com](https://docs.crypto-service.com)
DJ docs.crypto-service.com
- Title Libraweb
URL <http://www.libraweb.net>
HJ <http://www.libraweb.net>
DJ [libraweb.net](http://www.libraweb.net)
- Title Libraweb
URL <https://www.libraweb.net>
HJ <https://www.libraweb.net>
DJ [libraweb.net](https://www.libraweb.net)

Shibboleth

What we need to know:

- **EntityID**; this is the unique identifier for your Identity Provider (IdP)

What you should check:

- Your IdP should be configured in order to pass the attribute ***EduPersonScopedAffiliation*** correctly; the *EduPersonScopedAffiliation* parameter is essential to ensure that users logging in via Shibboleth can access the content to which their institution subscribes.

OpenAthens

What we need to know:

- The **scope** of the **Identity Provider (IdP)** to be enabled
All IdPs within the federation are already present in our Discovery Service.

What you should check:

- Your IdP should be configured in order to pass the attribute ***EduPersonScopedAffiliation*** correctly; the *EduPersonScopedAffiliation* parameter is essential to ensure that users logging in via OpenAthens can access the content to which their institution subscribes.
