Academic Series on Torrossa

The ongoing project for the complete digitisation of the publisher's archives includes over 1,300 monographs and conference proceedings. The project also covers digitisation of the publisher's series archives. Currently available are the **complete archives** of the titles listed below.

INVENTARIO DEI MANOSCRITTI DELLE BIBLIOTECHE D'ITALIA

Started by Giuseppe Mazzantini in 1890, this series was created to be a complete catalogue of all the manuscripts held by Italian libraries.

Giuseppe Mazzantini, who personally handled the publication of the first 13 volumes, involved numerous specialists in order to compile an accurate reference tool for fundamental research.

In 1909 the work was resumed under the direction of Albano Sorbelli and was completed in 2013 with the volume 116.

The digital edition of this series includes all the 116 published volumes (1890-2013).

GABINETTO DISEGNI E STAMPE DEGLI UFFIZI CATALOGHI

Started in 1951, this series presents the catalogues of exhibitions held at the Gabinetto dei disegni e delle stampe degli Uffizi in Florence, which hosts one of the world's most extraordinary collection of drawings with over 150,000 works from the late 14th to the 20th century.

Along with images and detailed information about the artworks, each catalogue includes commentaries and essays from leading experts. Due to accuracy of the information contained and the quality of the texts these catalogues raisonnés are of particular interest to researchers.

The digital edition of this series includes all the 99 published volumes (1951-2012), including various that have been out of print for a long time.
